GM Binder is a tool that allows users to create and manage documents for their favorite Tabletop Role-Playing Games. The core feature in GM Binder is a Markdown editor that allows users to use a very simple syntax to create amazing looking documents. These documents are rendered using basic HTML and CSS in a web browser.

The Markdown editor and document preview within GM Binder.

THE CHALLENGE

Documents in GM Binder are produced using raw HTML and CSS. Users can generate PDF versions of their documents, but the current system relies on their web browser to do so, namely the browser's print-to-PDF ability. This
